Synopsis

This informative volume is part of the Color Atlas and Synopsis of Clinical Ophthalmology series, developed at Philadelphia's famed Wills Eye Institute. This exemplary series combines abundant, high-quality illustrations with a summary approach to the text to provide students, residents, and practitioners in all the healthcare professions with an up-to-date clinical overview of the major areas of ophthalmology. Each volume in the series addresses a specific ophthalmic subspecialty: Cornea, Retina, Glaucoma, Oculoplastics, Neuroophthalmology, Pediatrics, and Uveitis. Uveitis is a single-volume, easily accessible resource covering all the major aspects of ocular inflammatory disease, with information presented in a clear, straightforward format consistent with other volumes in the series. Improve the way you diagnose and manage inflammatory ophthalmic disease. Structured coverage of each disorder includes sections on epidemiology and etiology, history, physical examination, differential diagnosis, laboratory and special examinations, diagnosis, prognosis, and management. More than 450 full-color illustrations detail the clinical features of each disorder, illustrate pathogenesis, and assist in visual diagnosis. Complete coverage includes both the ocular AND systemic manifestations of each disorder to provide a more complete clinical picture. A companion website includes fully searchable text, as well as a complete image bank for quick reference.

Customer Reviews

"The bulleted and concise nature of this book makes it a useful, unique, and handy reference. Other books in the field may provide greater in-depth information and detail about the various inflammatory eye conditions, but such is not the purpose of this book. The authors express the hope that this book will become the go-to uveitis reference for busy clinicians. It is almost

there." Â ----- Â Weighted Numerical Score: 85 - 3 Stars Â - Doody Enterprises, Inc. (April 2012) Â - Ann E Bidwell, MD(Northwestern University Feinberg School of Medicine)
