Customer Reviews

Martin Walters is General Editor of the recent Travellers' Nature Guides to Britain, France, Greece and Spain (Oxford University Press), co-author of the Nature Guide to Britain in that series, and contributed much of the text on natural habitats to the popular reference book Earth (Dorling Kindersley). Michael Lavelle has designed and constructed several exhibits at the Chelsea Flower Show, achieving prestigious gold medals in 1999, 2003 and 2005.

Expected bigger illustrations but the book is quite complete and detailed

I gave this to my daughter for Christmas and she loved it! She works in a park and she will find it very useful to look up many wildflowers.

Simply Beautiful and educational. Great for the avid artist too.

lovely Illustration sand reference book

Complete book

Although this book boasts of 1700+ species of wild flowers and flora (wild flowers, trees, shrubs, herbs, heathers, grasses, rushes, sedges, cacti, carnivorous plants, aquatic plants, weeds and parasites) with 3800 plus illustrations by no stretch of imagination can it be called an encyclopedia as it doesn't even scratch the surface. For most species there is an English and Latin name, general description, main features, distribution, height and spread, habitat and leaf structure. There is also a distribution map and an illustration of the plant which in most cases is too small to be of any value. Not recommended as there are much better books
