Love this book. My son had it 30years ago and now his nephew loves it as much.

Asked questions and repeated names of dinosaus. Art work is realistic without being too scary for preschooler. Names with pronunciation is helpful.

We borrowed this book from the library and our 4 year old son loved it so much that we bought the paperback version. Although quite old (Apatosaurus is called by its old name of Bronotosaurus), this

book covers all the well-known dinosaurs, is well illustrated and includes many details and facts on size which generally appeal to children.
