# Veterinary Assisting Fundamentals & Applications (Veterinary Technology)

## Synopsis

Veterinary Assisting Fundamentals and Applications is a comprehensive book and reference for use by veterinary assisting students, practicing veterinary assistants, veterinary receptionists, and other supportive staff within a veterinary facility. The format allows the reader to quickly obtain resources and information regarding basic veterinary assistant principles and clinical situations. The material moves from basic to advanced information and includes the latest educational information in the industry.

Beth Vanhorn is a certified veterinary technician with more than 10 years of professional experience. When hired by the Dauphin County Technical School in 2005, she quickly got to work by outlining a curriculum for the Veterinary Assistant Program. Additionally, Vanhorn spearheads the Vet Science Club, an after-school organization for current and future students. Dr. Robert Clark is an Administrative Director for Dauphin County Technical School (DCTS), and the developer of the school's urban agricultural program. Upon realizing that there was no industry-recognized credential for veterinary assistants, he worked with the Pennsylvania Department of Agriculture (PDA) to lay the groundwork for this innovative program that could answer the need for credentialing.

Great book

Pretty basic. If you're just learning about animals then I recommend. easy easy read. If you're looking to buy I would rent instead.

bought this for my husband as an alterative to taking a course he was interested in but was too expensive. He is very pleased with it and able to take from it the knowledge he was looking for.

It is exactly what I need for the Veterinary Assistant classes I am enrolled in.

Very, very good condition!

This book really helped me with the class and was very clear

Exactly as described and in good condition. Thank you

yes, it gives a good foundation, but I am not in school yet and only bought to get a head start before I take the class. When I do the quizzes I have no answers to see if I truly understand what I am doing when I am home schooling myself.
