Customer Reviews

while this book (done in the style of the wonderful Tom Steinstra books) was helpful it lacked the descriptions and information that truly make a book of this type useful. we used the book while traveling in Idaho and Wyoming and it pointed out several spots. the ratings however were inconsistant with the sites we visited. some sites were rated 4 or 5 when they should have been a 7; others were rated at 5 when they should have been a 3. the book is obviously out of date but was the only book of this type we could find. there's a market niche out there just waiting to be filled!

Foghorn Outdoors: Montana, Idaho, & Wyoming Camping: The Complete Guide to more than

1200 Campgrounds

We ordered this from a different vendor and they sent us a different book completely and said this one was out of print. Luckily we found this one on . It was in great condition and exactly what we wanted. I'm from WY & was surprised at some of the camping spots they recommended. I would have thought they were too secluded to be included but sure enough they were there - and they are some of my favorites!! I highly recommend buying this book.

Again, I had hoped for more information about the campgrounds and the areas we would be visiting. Maybe the newer edition will be better.

The book was as advertised and I am very pleased with it. The book came in less than a week using regular mail.

All inclusive of number of campgrounds and locations, but descriptions meager, and repetitive. Allows little discrimination between campgrounds.

I have found this book to be exceptional and informative, although not as useful as Tom Steinstra's book detailing the same in the Pacific Northwest. This has the correct pricing for most, although occasionally sites raise fees. It also gives short but descript explanations of amenities and sites in the immediate area. I am not sure how someone can say this is not useful, unless they do not have an aptitude for map reading. If you review the maps in the book, along with a road atlas, this is simple. I tend to highlight the sites I like on my atlas with a fine felt tip pen so I do not have to thumb through the book while driving...

My husband bought this for me for Christmas, to plan our anniversary trip in June. I browsed through it, disappointed with how difficult it was to find campgrounds along our route, how cumbersome looking up maps was, as well as that difficult table of contents. Just look in the book online -- what does MT3 tell you? Nothing. That's the problem. Check out [...] for help finding a campsite. We're into National Parks, and the best overall guide for the Western US we've found is Fodor's Road Guide USA : National Parks of the West. It has enough detail on each park to give you a basic understanding of what you can expect. Don't try this for a hiking guide though.

Perhaps the worst camping reference I own (make that owned). The book is full of repeated text. A half-hearted effort at best. Only the most basic information is provided for each campground. Not near enough for an out-of-towner or out-of-stater to confidently plan a trip. I ended up tossing it out in favor of multiple web sites (for detailed campground info) combined with the Montana Atlas and Gazeteer (for accurate mileage, elevation, etc.). There is absolutely zero information about the surroundings, forestation, landscape, or scenery at each campsite -- only general comments about the larger area or national forest in which each campground is located.
