# Presbyopia Research: From Molecular Biology To Visual Adaptation (Perspectives In Vision Research)

## Synopsis

Seeing is life. Seeing is transforming luminous colors. We wish to extend our academic and theoretical knowledge of stimulations and shapes into a mental representation of knowledge and also to complete and exchange our vision, structured in space and in time. But seeing is technical and professional experience to prepare also opening onto the world that surrounds us: it is corrective means for the future. thus a means for communicating and learning. Numerous questions have yet to be answered, Jean-Jacques Rousseau, a philosopher worth such as: quoting during the bicentennial of the French Revolution of which he was an instigator, stated, "of all the arts Will it one day be possible to defer or stop the senses, vision is that which can be the least aging of the accommodative apparatus? readily separated from judgments of the mind. " Is further improvement of the current corrective sight is increasingly called on in our modern means possible, whether spectacles or contact lenses. Maturity is affected at about 40-45 years by lenses? the onset of presbyopia. At that age, which demands How are behavioral and psychological presbyopia all our intellectual and physical means, our sight typologies to be integrated in the course of examination should be irreproachable. Our efficiency must not be in question, prescription, and fitting with corrective diminished.

## Book Information

Series: Perspectives in Vision Research (Book 252)

Hardcover: 301 pages

Publisher: Springer; 1991 edition (August 31, 1991)

Language: English

ISBN-10: 0306436590

ISBN-13: 978-0306436598

Product Dimensions: 8.4 x 1 x 11.8 inches

Shipping Weight: 2.2 pounds (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #1,003,596 in Books (See Top 100 in Books) #90 in Books > Textbooks > Medicine & Health Sciences > Allied Health Services > Optometry #139 in Books > Medical Books > Allied Health Professions > Optometry #187 in Books > Textbooks > Medicine & Health Sciences > Medicine > Basic Sciences > Immunology
