Customer Reviews

While some of the directions and walks really got us to some interesting places others just made no sense. We read them over and over and even with our maps and walking back and forth we could not find the way. On one we ended up in circles. It clearly needs updating to reflect changes. So this is a mixed bag

Out of date and confusing directions.

We love this book and heartily recommend it. Each hike we've done so far has been very different and each contains interesting side notes we would have missed (like the one where the trail briefly

follows along a Roman built road). Also multiple times there would be a fork in the path with trail blazes indicating different routes and the author's clear directions helped us considerably. We deviated twice from what the author advocated and got lost both times. Our mantra now when we think the book is wrong is "trust the author".

This guide looks to be an excellent guide to seeing some of the sites of the Dordogne. It is necessary to drive a car to get the the start of these hikes, and they basically go on the GR trails, which are for the most part well marked. It is beautiful country to walk in, and you can always find a good bottle of wine in the villages, and sometimes a good bakery.

My husband and I, along with 2 friends used this book 3 separate days last month as a guide to hiking in the Dordogne region. How 4 intelligent, athletic and experienced hikers could get so lost, so many times has to be at least partially the fault of the book we were using as a reference! The writing is so unclear, directions mixed in with rambling observations - don't waste your money. Buy Lonely Planet instead, or just use the well marked national trails. The author should be ashamed.

This book has a lot of information for those who want to walk in Dordogne. Nevertheless, it describes only short hikes. So, if you want to do a long hike, as a crossing or a circuit, it doesn't help so much.
