Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

Beautiful quality and well packaged, so no damage or wrinkles. However, buyers should realize that,

because of the scale of the map, this is not an ideal map for using to "mark" cities visited as a family (which was the purpose I originally bought the map for, not thinking about the facts that the United States is too small for that purpose on this map). Still, because the map is so gorgeous, we gave it to a school teacher friend for her school room wall.

A very nice map, but turned out to not be detailed enough for my needs...a result of including the whole of North America. I ended up getting a USA map, but if you don't need every little town to show, this is a very nice map.

Gorgeous map with great detail of North American locations!

using to track a friend's journeys as she travels the continent. EJ

The laminated map is a good size, easy to see and use. The lamination protects the map and I expect it to last many years. The map is well diagrammed and easy to find exactly what you are looking for. The map is well done.

This map is JUST what I needed for my office! It allows me to manage my territory (I work in undergraduate recruitment) with a beautifully crafted visual aid.

Love it functions as both a map and as a perfect wall poster. It had a speedy delivery and is exactly as I ordered and what I wanted. Even as a bonus shows some of South America as well as Alaska.

We bought this map for our grandsons to follow our trip from Colorado through western Canada to Alaska on the Alaska Highway. They have really enjoyed learning about these new places and marking the roads we have traveled on this map. They are getting a summer course in geography and don't even realize they are "in class." A great tool for kid's education!
