Customer Reviews

It is amazing how much I learned from this short little book on insurance that I never bothered to understand before. I was under the impression that all insurance was probably good enough. This book does NOT try to scare you AT ALL but it lays out the industry and products very clearly so that I can make my own decisions. It also gives you a lot of common misnomers or little known facts that you should look for when buying insurance. I'm going to do some major dissection of our policies now that I've read this! It took me one day to read this and I bet this knowledge pays dividends for years to come!

Great review of insurance products and how to get the most for your money. Very helpful understanding how insurers look at you from a risk perspective, and an honest discussion of when

(and when not!) to file claims. I would recommend this to anyone who buys and uses auto, home, umbrella, or other insurance. There are super online resources and references from the authors, as well.

mostly pretty basic info

I got this book as a gift from a friend who had a really bad house fire a few years ago. After reading the home chapter, I bought one for my mom and dad too. It's simple enough and the questions at the end of each chapter are super helpful.

What a wonderful guide for the everyday insurance consumer. It takes you from the sale through claims. Handy worksheets that are in everyday talk and not insurance lingo. Many of the questions are pointed and direct to hopefully get a direct answer. the claims guide is a must to be sure you are handled professionally and fairly. Great tips.

As a former insurance commissioner, I highly recommend this book for people wanting to understand insurance enough to make wise purchases. Start saving now!
