Math in Focus: The Singapore Approach, Grade 4A

Not a fan of the current curriculum. However, in the interest of providing opportunities for success for my children and supporting them at home, this book is right on the money as a tool that parallels the work being done in class. Spend the money. Get this book. And then spend time with your child(ren). Eventually the "new" way of doing even the simplest math will make sense to the both of you! ;-)

I bought this curriculum to use when I tutor. There are many pictures, diagrams and clear student-friendly illustrations presented without a lot of clutter. The workbook is a perfect companion for additional practice and reinforcement.

Great quality! Fast!

Great product in great condition!

Thanks

Miracle math. Nothing more needs to be said.

seems to explain the subject well for easier learning, challenges my son also, so I will go it 5 star
