God wins everytime! I gave Lyme disease to my kids unknowingly in the womb, thanks medical system for not telling people Lyme is an std and passed in the placenta and breast milk! Stop believing the lies they tell us they only want your \$\$\$\$\$. This book is a great read tells the truth from

the minority side! Give to all your wannabe moms or expecting, heck give everyone. wake up world.

Everyone who is planning on having children need to read this book. My son and daughter in law borrowed this book to me to read and I am thankful they did. I would have made a few different decisions had I read this book prior to having children. It is amazing what hospitals/doctors neglect to share with you. More amazing is how the U.S. compares to other countries in infant mortality rates. The cost difference between a vaginal birth and a c-section and using a midwife. The number of unnecessary c-sections often caused by other medical decisions. Even just understanding how the traditional hospital birth method make birthing more difficult...how small adjustments could eliminate many c-sections. Things that are done for the comfort and the convenience of the doctor and or hospital instead of what is best for the mother and baby. Best thing parents to be can do for their baby is be informed and know their rights.

I enjoy a book that resonates with my beliefs and Baby; designed by God is a modern no non-sense view of parenting that takes on many of the issues and problems and confusion of modern parenting and explains them with an eloquence. I have had 5 children and have faced many of the many modern 'ways' of parenting while internally feeling that my intuition as a mother was been run over by medical doctors, other parents fears and old ,well meaning and fallible guidance. This book will re-enforce your God given intuition as a parent and refresh your well worn parenting ears. Have heart, this book is a lovely read.

I loved this book very informative. I wish I knew all this information before I had my first child. I did know some but this book, sheds a light on holistic care and natural birth for mother and child. Also healthy eating habits as far as eating whole organic food and protecting our children from toxins prevalent in our environment today. Because of this book I have found a family chiropractor and our whole family will be getting adjusted regularly. I would recommend this book to all families.

This is a great resource for expecting and new parents. A definite must on your list of parenting books. As a new mom, my husband and I try to parent in a similar way. We listen to our innate and let our child grow up with the least intervention as possible. As a result we have a beautiful, happy, and healthy 15 month old.

The opinions in this book are very strong and they make you feel like if you don't parent like them,

you are doing it wrong.

With all the Fear-based baby books out there this is a relief to all new parents. Finally, someone wrote a book with all the natural approaches to health for baby and family! I recommend this book to all my own patients.-Dr Boles

Incredible read by some incredible people. Great for new parents and people curious about true health.
