The Mess We're In: Managing The Refugee Crisis

Synopsis

Detailing the issues of the global refugee crisis is easy, finding a workable solution is not.. The Mess We're In - Managing the Refugee Crisis is a resource to better understand all aspects of the global refugee situation and what options are available to best help refugees. It uses a management consulting approach to structure and review the refugee situation. This book will equip you to be an informed part of the debate. The global refugee crisis is not simple and must be thoroughly understood in order to find the best way forward. The future of billions of people rest on how the world responds. The Mess We're In - Managing the Refugee Crisis is a resource to better understand all aspects of the global refugee situation and what options are available to best help refugees. It uses a management consulting approach, common in business, to structure and review the refugee situation. Through this it aims to:

- Present all the relevant facts and considerations of the global refugee situation.
- Detail Australia's specific immigration and refugee context.
- Summarise the major issues regarding the current global refugee situation.
- Outline the moral questions to answer in determining what it means to best help refugees.
- Analyse the main approaches to helping refugees tried or proposed to date.

The subjects explored include human rights law, economics, sociology, political structures, history, demography and of course, morality. The Mess We're In - Managing the Refugee Crisis covers a wide range of topics to provide a full landscape of considerations. The current refugee situation is a mess. There are no easy answers and changes must be made for things to improve. This book will equip you to be an informed part of the debate. Andrew Bennetts is a management consultant with an interest in the global refugee situation. Since 2003 he has defined and clarified business issues for Australia's largest companies. Across industries including Agriculture, Automotive, Construction, Finance and Telecommunications he has provided structure to help understand complexities and assess business options. The Mess We're In - Managing the Refugee Crisis Dilemma is his first book and applies the same rigour in reviewing the global refugee crisis.

Customer Reviews

Andrew Bennetts is a management consultant with an interest in the global refugee situation. Since 2003 he has defined and clarified business issues for Australia's largest companies. Across industries including Agriculture, Automotive, Construction, Finance and Telecommunications he has provided structure to help understand complexities and assess business options. *The Mess We're In - Managing the Refugee Crisis Dilemma* is his first book and applies the same rigor in reviewing the global refugee crisis.

Easy to follow and well structured. Something in this for everyone; from those seeking to understand the basics of the subject, to experts in the domain. A very topical issue well explained and obviously thoroughly researched.

A brilliant, well-thought-out expose on the world's refugee crisis that looks at issue from all standpoints. Hard-hitting, and backed up with statistics, it provides thinking material for those who wish to understand where the world is at when it comes to the issues surrounding the refugee crisis. While options and outcomes of possible "solutions" are provided, it's clear this is a mess the world needs to address, but one that has no finite answer on how to help those who need it most. Highly recommended.

This was the most balanced book on the global refugee crisis I have ever read. It provides an indepth and thorough understanding of all aspects of the global refugee situation and what options are available to best help refugees. Author, Andrew Bennetts does a brilliant job in giving readers a thorough analysis of this complex dilemma. Not only does he outline the big moral questions in working out what it means to help refugees, but he also gives a comprehensive overview of possible resolutions Let's hope our world leaders take a leaf out of this book!

Good introduction to history and development of refugee crisis since the world's governments and bureaucracies started recording the movements of people and tried to assist each other. It seems that their efforts have failed and are still failing as the numbers of displaced individuals are increasing. How will these governments protect themselves and their population? Who are they really protecting? This book has so far raised many questions in my head. I am yet to find the answers. I've discovered that only small number of displaced people are assisted via legal channels. Maybe people can only get themselves out the crisis.

An excellent read. The Mess We're In is a comprehensive resource book that thoroughly details all aspects of the global refugee crisis. Well researched and informative, it also summarises the major issues facing Australia, with a balanced review of the options available. The book contains a lots of easy to read charts and tables. A timely and valuable addition to this important debate.

Not an easy subject to tackle at the best of times...but the author has managed to do so in a such a way that the reader is drawn in. I felt like I was part of the dialogue, rather than having a position dictated to me. Quite an achievement! I highly recommend this book, whether you are only beginning to explore the issues, or want to expand on your existing knowledge.

This book provides a comprehensive analysis of the refugee crisis. It examines the complexities of the practical issues and the considerations that must be assessed in finding a moral, workable response. It is well structured, well researched and thought provoking.

Helped me get my head around a really complex situation with no easy answers. At times perhaps a little too in depth (at least for what I was after), but overall it's thoughtful and informative, and its conclusion is balanced and well reasoned. Highly recommended.
